PROFILE

I am finishing my Computer Science degree while building and deploying full-stack and AI applications with Python, TypeScript, JavaScript, SQL, and modern web technologies. My four years of customer-facing experience have strengthened my problem-solving, communication, and teamwork skills.

EDUCATION

Thompson Rivers University

Bachelor of Science in Computer Science

Degree requirements in progress; final capstone course remaining

Kamloops, BC

Expected 2026

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, PHP, Java, SQL

Frameworks & Web: Next.js, React, Streamlit, Phaser 3, HTML/CSS, REST APIs, AJAX

AI & Data: RAG, LLM APIs, Sentence Transformers, semantic search, PostgreSQL (Neon), MySQL, Oracle Database, MongoDB

Platforms & Tools: Git/GitHub, Vercel, Clerk, Drizzle ORM, pytest, Xcode, Android Studio, XAMPP

PROJECTS

CiteBack - Evidence-Grounded Academic Paper Assistant

[Live Demo](#) | [GitHub](#)

Python, Streamlit, RAG, Sentence Transformers, Groq API, NumPy, pytest

- Built an evidence-first RAG application that answers questions about academic papers while tying responses to supporting passages and PDF page numbers.
- Engineered page-aware PDF extraction, text cleaning, context-aware chunking, local embeddings, and NumPy similarity search.
- Generated grounded responses with Llama 3.3 through the Groq API and added second-pass citation validation with automated pytest coverage.

OfferTrail - Job Application Tracker

[Live Demo](#) | [GitHub](#)

Next.js, TypeScript, PostgreSQL (Neon), Drizzle ORM, Clerk, Vercel

- Rebuilt the original PHP and MySQL application with Next.js and TypeScript, creating a modern dashboard for tracking applications, interviews, deadlines, and status updates.
- Designed user-scoped CRUD workflows with Neon PostgreSQL, Drizzle ORM, server actions, and a dynamic calendar that displays application activity by date.
- Integrated Clerk authentication with Google sign-in and protected routes, then deployed the production application to Vercel with a custom domain.

Subject Zero - 2D Zombie Survival Game

[GitHub](#)

Phaser 3, JavaScript, HTML5, Git

- Developed a browser-based survival game with story objectives, wave-based combat, character progression, and an endless mode.
- Programmed enemy AI, obstacle rerouting, anti-clustering, collision detection, spawning, scoring, power-ups, and difficulty scaling.

SportsPro - Technical Support Web Application

[GitHub](#)

PHP, MySQL, HTML/CSS

- Built a database-driven support system for administrators, technicians, and customers to manage products and technical incidents.
- Implemented authentication, sessions, role-based authorization, CRUD workflows, validation, and prepared SQL statements.

EXPERIENCE

Rogers Communications - Sales Representative

Apr 2022 - Present

Langley, BC

- Advise consumer, corporate, and small-business customers on mobility and residential services while staying current on changing products, pricing, promotions, and policies.
- Identify customer needs, recommend appropriate solutions, and resolve service and account issues in a fast-paced environment.
- Collaborate with team members to support store operations and meet individual and store performance targets.
